This Week's Poll

How should the Town proceed with the conservation easement on the 140+ acres of Flint Hill land?

- Town should pay legal costs and ConsCom should pay easement monitoring fees.
- ConsCom should reconsider their vote and pay all costs.
- Town should scrap current contract with Bear Paw and renegotiate.

vote

"Ask the experienced rather than the learned."
Arabic proverb

Raymond High graduate Ami Neeper to pursue Doctor of Pharmacy degree

Friday, 05 June, 2015

Ami Neeper graduated from the College of the Holy Cross on May 22nd with a Bachelor of Arts degree. She majored in chemistry with a concentration in pre-health and earned a minor in visual studio arts as well.

Neeper was a member of the Raymond High School Class of 2011 and was an active member of the Reach High Scholars Program. She attended the Phillips Exeter Academy Summer School in 2009 and the Brown Leadership Institute during Summer@Brown in 2010. Neeper is also engaged to a fellow Reach High Scholar, Stephen Diamond, RHS '10. Diamond graduated from Worcester Polytechnic Institute in 2014 and works at BAE systems in Nashua as a software engineer.

While at Holy Cross, Neeper helped to fund raise for medical-related charities and was involved in numerous other on-campus activities,

Kids Reaching Their God-Given Potential

including the Science Ambassadors, where she helped teach and explore science with students from local public schools in Worcester, MA. Neeper also managed activities for the American Medical Student Association, and as part of the Chemistry Student Advisory Council, she administered course evaluation forms and evaluated faculty considerations for tenure. Upon graduation from Holy Cross, Neeper was certified with the American Chemical Society, a recognition of the broad-based and rigorous chemistry education she received at Holy Cross, which, in her words, gave her "the intellectual, experimental, and communication skills to become an effective scientific professional."

"For my past two years here on the hill," Neeper explained, "I have participated in the Holy Cross Research Program . . . conducting research in the field of inorganic chemistry. Specifically, I research and synthesize novel rhenium compounds. My most recent projects have involved synthesizing new rhenium compounds that could improve the resolution of medical imaging agents."

Starting in the fall, Neeper will be participating in the Accelerated Pharmacy (PharmD) Program at the Massachusetts College of Pharmacy and Health Sciences in Manchester, NH, an intensive professional course of study leading to the Doctor of Pharmacy degree. Neeper plans to complete her degree in May 2018 and says she has "aspirations to go into pharmaceutical research and development" after graduation.

Neeper, who is the daughter of Brett Neeper of Raymond and Rebekah Doucett of Epping, calls her dad her "biggest supporter" and said she hopes "to continue to make him proud."

Neeper's friends in Raymond can be sure she will go on to do just that.
